Here are some comments on the documents. For both, I think the "P" criteria are definitely met. For UV-

Hi Todd,

Here is a copy of the Convention text along with the UV-328 listing proposal and Dechlorane Plus risk profile (both with my initial comments) that we are asking for your help reviewing for the upcoming technical committee meeting. I've also attached a meeting document with supporting information for the risk profile.

Looking forward to our discussion tomorrow,

Laura

Hi Todd,

I was excited to hear that Yvette has asked you to work with Laura Nazef and me as the "chief scientist" from OPPT on our OCSPP work related to POPs. Welcome to the team!

Laura and I would like to find 30 mins. over the next few days to walk you through the Convention and talk about how it works. By doing so, we can frame the work of the technical committee that supports the Convention and help focus OPPT's role in terms of providing the necessary scientific support.

Ex. 5 - Deliberative Process

Laura has offered to look at our schedules to find a time that works for the three of us. Please be on the lookout for a teams invite from her.

Thanks so much, we appreciate your willingness to step into this international role.

Best,
Karissa
